Paul - Whenever I get an affidavit off / if I don't have another one waiting I try to reduce the accumulation a bit. Today I found VOI copies of Secret Service copies of FBI records released to Walter Levy - copied for you when I received the stuff last October! I have no idea what it is. Almost [illegible] - boyish [illegible], although it could have [illegible] the interests of others, like Gole. Anyway, they'll go bel mail when possible. ...A little bit of I hope more than temporarily encouraging news about retrieval capabilities: I found a night-class student at the local college who is willing to work on the general release files daytime when she's free. Today she made a good start. I'm integrating the two releases, by file, beginning with 62-109060. When she is finished they'll be in sequential order and all those not already in individual and clearly identified file folders will be. I plan to do 105-82555 next, then 62-109090 and then the bulkys, of which I have maybe 40,000 pages. Then FOs. When she has this in order I'll get to my overflow files, regular office files for which no room and inactives moved to basement, after which I'll make more space in office files. Plenty of work if she does not get a better job. I've had a few speaking engagements but not of which I'm using this way. One more scheduled so I think there will be enough to get this mess cleared up. ...Dear Minkle is doing Lane series in Chronicle. ...On other things, esp. HSCA, you probably know more than I do. All I've heard lately is that they'll have no pix in report and that the Ray stuff has been printed.
